

## CHEMICAL RESISTANT PUMPS AND MIXERS FOR CORROSIVE FLUID HANDLING

Thermoplastics: PP, PVC, PVDF. Other pump components made in: EPDM, FPM, PTFE, Ceramic, SiC, FRP.

<b>AS</b>	Vertical centrifugal pumps up to 3000 mm in length.	
<b>GA</b>	Vertical centrifugal pumps with recessed impeller.	
<b>GP</b>	Vertical centrifugal pumps with volute pump casing.	
<b>BS</b>	Vertical centrifugal pumps with cantilever shaft. No bushings.	
<b>OMA</b>	Horizontal pumps with single or double mechanical seal.	
<b>OP</b>	Horizontal centrifugal pumps with volute pump casing.	
<b>PA</b>	Horizontal centrifugal self-priming pumps.	
<b>SP</b>	Horizontal centrifugal pumps with priming tank.	
<b>FUS</b>	Electric or air-operated drum and barrel pumps.	
<b>AG</b>	High, medium or low speed top entry mixers.	
<b>AC</b>	Top entry mixers with axial circulation pipe.	
<b>AP</b>	Top entry mixers with pumping pipe. Axial pumps.	
<b>AN</b>	Top entry mixers with cantilever shaft.	
<b>AR</b>	Immersed areators.	
<b>PFT</b>	Portable scale removers. Trolley-mounted or stationary.	
<b>BX</b>	Air operated double diaphragm pumps (AODD).	
<b>BM</b>	Mag-drive pumps. Suitable for clean liquids only.
